HAZARD DATA SHEET Yes and considered to be non-hazardous

AVAILABLE FROM INTERCLAD (UK) LIMITED

REQUESTED 1992

RECEIVED 1992

ASSESSMENT RECORD

ASSESSMENT OF EXPOSURE

Non-flammable and not considered hazardous.

ACTION REQUIRED

Cladfix Antistatic is very unlikely to present a hazard either to the operatives or those working in the vicinity. However sensible precautions should be taken to ensure that eyes and areas of sensitive skin are protected during prolonged use.

FIRST AID

EYE – Rinse with copious amounts of water for at least 15 minutes. Seek immediate medical attention if the eyes remain irritable.

SKIN CONTACT – Wipe-off excess from skin with a clean cloth. Clean with a proprietary skin cleanser. Wash with soap and water. Obtain medical attention in case of skin irritation or other cause for concern.
